DETAILED ACTION

Applicant's election of SEQ ID NO: 11 in the reply filed on 09/25/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The Examiner wishes to acknowledge and thank the applicant for a timely election of this species. After further consideration, however, it has been determined that instant claims 1-10 do in fact recite distinct species that have acquired a separate status in the art because of their recognized divergent subject matter. Therefore a further supplementary restriction requirement, listed below, is required. The Examiner sincerely apologizes for failing to make this distinction in the previous office action, and for any inconvenience this has caused the applicant. As a secondary issue, the Examiner has also discovered claim informalities, listed below, that should be corrected in order to expedite prosecution.

OBJECTION

Claims 9 and 10 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Claim 9 depends from the method of claim 1 and claim 9. The Examiner believes claim 9 (line 3) should be new claim. Claim 10 depends from the method of claim 10. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

SPECIE ELECTION REQUIREMENT

This application contains claims directed to patentably distinct species of the claimed invention. The applicant is further required to make the following specie election for purposes of examination:

Specie A: Species of target nucleic acid molecules cited in claims 6, 7, 9, and 10, which are directed to pathogenic organisms, specific genes and promoters, transgenes, and viruses, and thus generally separately classified and published, and thus document undue search burden if searched together. Thus applicants are required to select a first and second target nucleic acid molecule from those listed in claims 6, 7, 9, and 10 to begin prosecution.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5 are generic to the above species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
